

ENVIRONMENT POLICY

Realising all businesses have an impact on the environment, the Company accepts it has a responsibility to improve and maintain the environment. It provides the necessary resources to implement the requirements of the international standard ISO14001:2015. The company works closely with its approved suppliers and sub-contractors with a long-term aim of providing product, which can be recycled when no longer fit for purpose and were possible, and will reworked or reprocessed rather than allocated for disposal. The environmental aspects of manufactured products are assessed and monitored, as new technologies are introduced, when acceptable they are adopted and controlled within the environmental documentation.

The company has a commitment to meet or exceed legal, regulatory or other requirements, which impact on their business, striving for continuous improvement, while minimising the creation of waste and preventing pollution. Energy use is monitored and kept to the minimum while looking at new ways of implementing efficiencies. The premises and land under the control of the company are maintained to limit any waste being transmitted or received from surrounding areas.

Significant environmental aspects with set objectives are maintained, covering its operations to provide the most effective method of operation eliminating pollution and waste. The Company provides polices and approvals on its web site.

The Managing Director has overall responsibility for the company meeting its environment obligations.
